

ELFET

RESONANCE CHAMBER

Model : NANO

www.elfet.org

Technical Specifications

Resonance Chamber – Model : NANO

ITEM	DESCRIPTION
RESONANCE CHAMBER - MODEL : NANO Counter Top Version	Mild Steel - 2tone powder coated Opening Door - fitted with handle and hinges - opens upward 2 Removable Shelves - 300 x 420mm Acrylic Domes Fitted Left and Right PCB's Mounted Left and Right
Weight - fully assembled	37kg
Dimensions W,D,H	1280 x 600 x 685mm
Domes	Qty 2 Diam 540mm Acrylic - Moulded
Aerial PCB	Qty - 4 Diam 500mm Hard Wired to 19" XLR mounted Sockets
Rear mount 19" Plate	4 x XLR mounted Sockets - male XLR Sockets connect to Audio Cables from Cabinet Inside Wired to PCB inside domes USB Extension Cable - for LED - wired in place
USB - 5V Input Cable rear	For LED strip to light : Inside Chamber & Between PCB
Mountings	Adjustable feet - to level on Counter or Table

Nano Chamber – Computer Configuration

ITEM	DESCRIPTION	ITEM	DESCRIPTION
19" COMPUTER CABINET 220V System	12U - Steel, Black Powder Coated Lockable front Glass door Lockable panels - Side & Back 2-4 Fans for cooling LED Strip for lighting	19" Plate - Rear	4 x Female XLR Sockets - mounted Male / Female XLR Cables connected from here to the nano Chamber
Cabinet 12u - Dimensions W, D, H	600 x 600 x 710 mm	PDU - Rear	Mounted 5 Way Power Strip - SA Sockets - with circuit Breaker Powers All the Electrical and Audio devices
Cabinet 12u - Weight - Kg	63 Kg	Cables	Power And Audio Cables - as per specifications
Mountings	Adjustable feet AND Castors Can also be counter top mounted - with Laptop on the side	LED Power Plug - 5V	2Way 5V Power Plug - USB 1 - for the Cabinet LED Strip 2 - for the Chamber LED Strip
Laptop - On top of Cabinet	Lenovo IdeaPad - Gaming Laptop i5 or i7 16GB RAM - min SSD drive 128GB or higher Win 7, 10 or 11	Software - Installed	Cycle.exe - Encrypted Audio Session Application Axcrypt Win10 Stop Updates Security Software Help Files and Instructions All Microsoft Apps UNINSTALLED Various Other Security Settings Other Security Apps SPECS are subject to change without prior Notice !!
Audio Interface - Front	Presonus 1824C or Similar Custom Configured		
Amplifiers - Front	3 x ELA226 Amplifiers - Stereo For 6 Channel Configurations		

Technique & Applications Explained

Introduction

Our ELFET technology and frequency techniques have been successfully developed for more than 25 years. There have been a range of equipment and techniques used over the years – all incorporating nature's geometry and mimicking of geometric formative patterns – otherwise known as bio-mimicry.

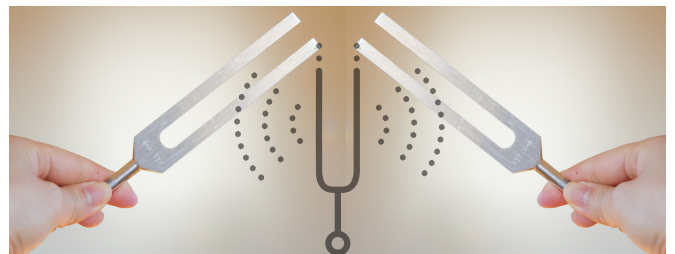

One-of-a-kind and unique software tools are used to create very complex audio signals. These signals are amplified and transmitted via various types of aerials inside of so-called resonance chambers (and the chambers can vary in size, shape and type of materials used).

Various materials and products are placed inside of these resonance chambers for periods of 6-48 hours (depending on whether they are liquid or solid items, and depending on the application).

Technically, vibration is frequency – our technology encompasses SVP (Sympathetic Vibratory Physics) – a process of sympathetic resonance.

Sympathetic resonance explained :

When 1 of 2 tuning forks of the same frequency (in close proximity) is struck, the 2nd one also starts vibrating and emitting a tone – without being touched. It can be said that similar dynamics occurs in the human body

With ELFET, the SVP just happens on a more subtle level.

The Process

Very sophisticated and bespoke software applications are used to create audio files that are representative of amazing 2D and 3D geometry – with correct spin orientation. These audio files are carefully planned and inserted into a matrix that will determine the combination and outputs of each of the many files created.

Outputs of these files are not per normal audio techniques, and the electrical fields that they create, imparts a resonance into the materials that are placed in proximity to these fields – ie inside the treatment chambers or vessels used.

The changes that the resonance imbues into the material, can be described as an electro-magnetic tempering process – similar to a metal heat tempering process. The amazing benefits that these treated items offer, have been demonstrated over a few decades.

When these “treated” items are placed in, on, or near to biological products, they impart some of these “subtle” energies to the recipient/liquid via a process called SVP.

Science do not yet have equipment to measure these subtle changes, and so it has become necessary to demonstrate the claimed efficacy rather than technicalities of our process and techniques. Globally, the results have been more than satisfying in plants, animals and people – and is the reason for our continued development.

Applications

The technology is Natural, Green, Safe and Future-proof – having many applications on the fields of :

- **Natural Health Care**
- Animal Husbandry
- Agriculture

Benefits for Health practitioners

BENEFITS OF THE NANO CHAMBER

ELFET treatment processes, enhances and improves the properties of any product or remedy, with some of the benefits listed below :

- Natural Pain Relief – for most types of pain,
- Vastly improved wound healing,
- Faster recovery from injury or illness,
- Structures drinking water for best hydration,
- Much improved efficacy in skin care and cosmetic applications,
(also – 30-40% less actives needed)
- Improves bio-availability of nutrients and minerals,
- Green for the environment, producer and consumer.
- Vitality
 - Improved Energy,
 - Improved Strength,
 - Improved cellular oxygen concentration,
 - Balanced emotions and meridian flow.

Type of materials that can be treated :

- Creams, lotions and potions,
- Minerals and vitamins,
- Pillows, blankets, towels,
- Drip bags, wound dressings, bandages etc,
- Surgical implements and tools,
- Prosthetic limbs and splints,
- Implants for hip and knee replacements.

Any item, be it a solid or a liquid, will be improved after it is treated. The subtle resonance will improve efficacy of all treated products – improving the healing process

Summary

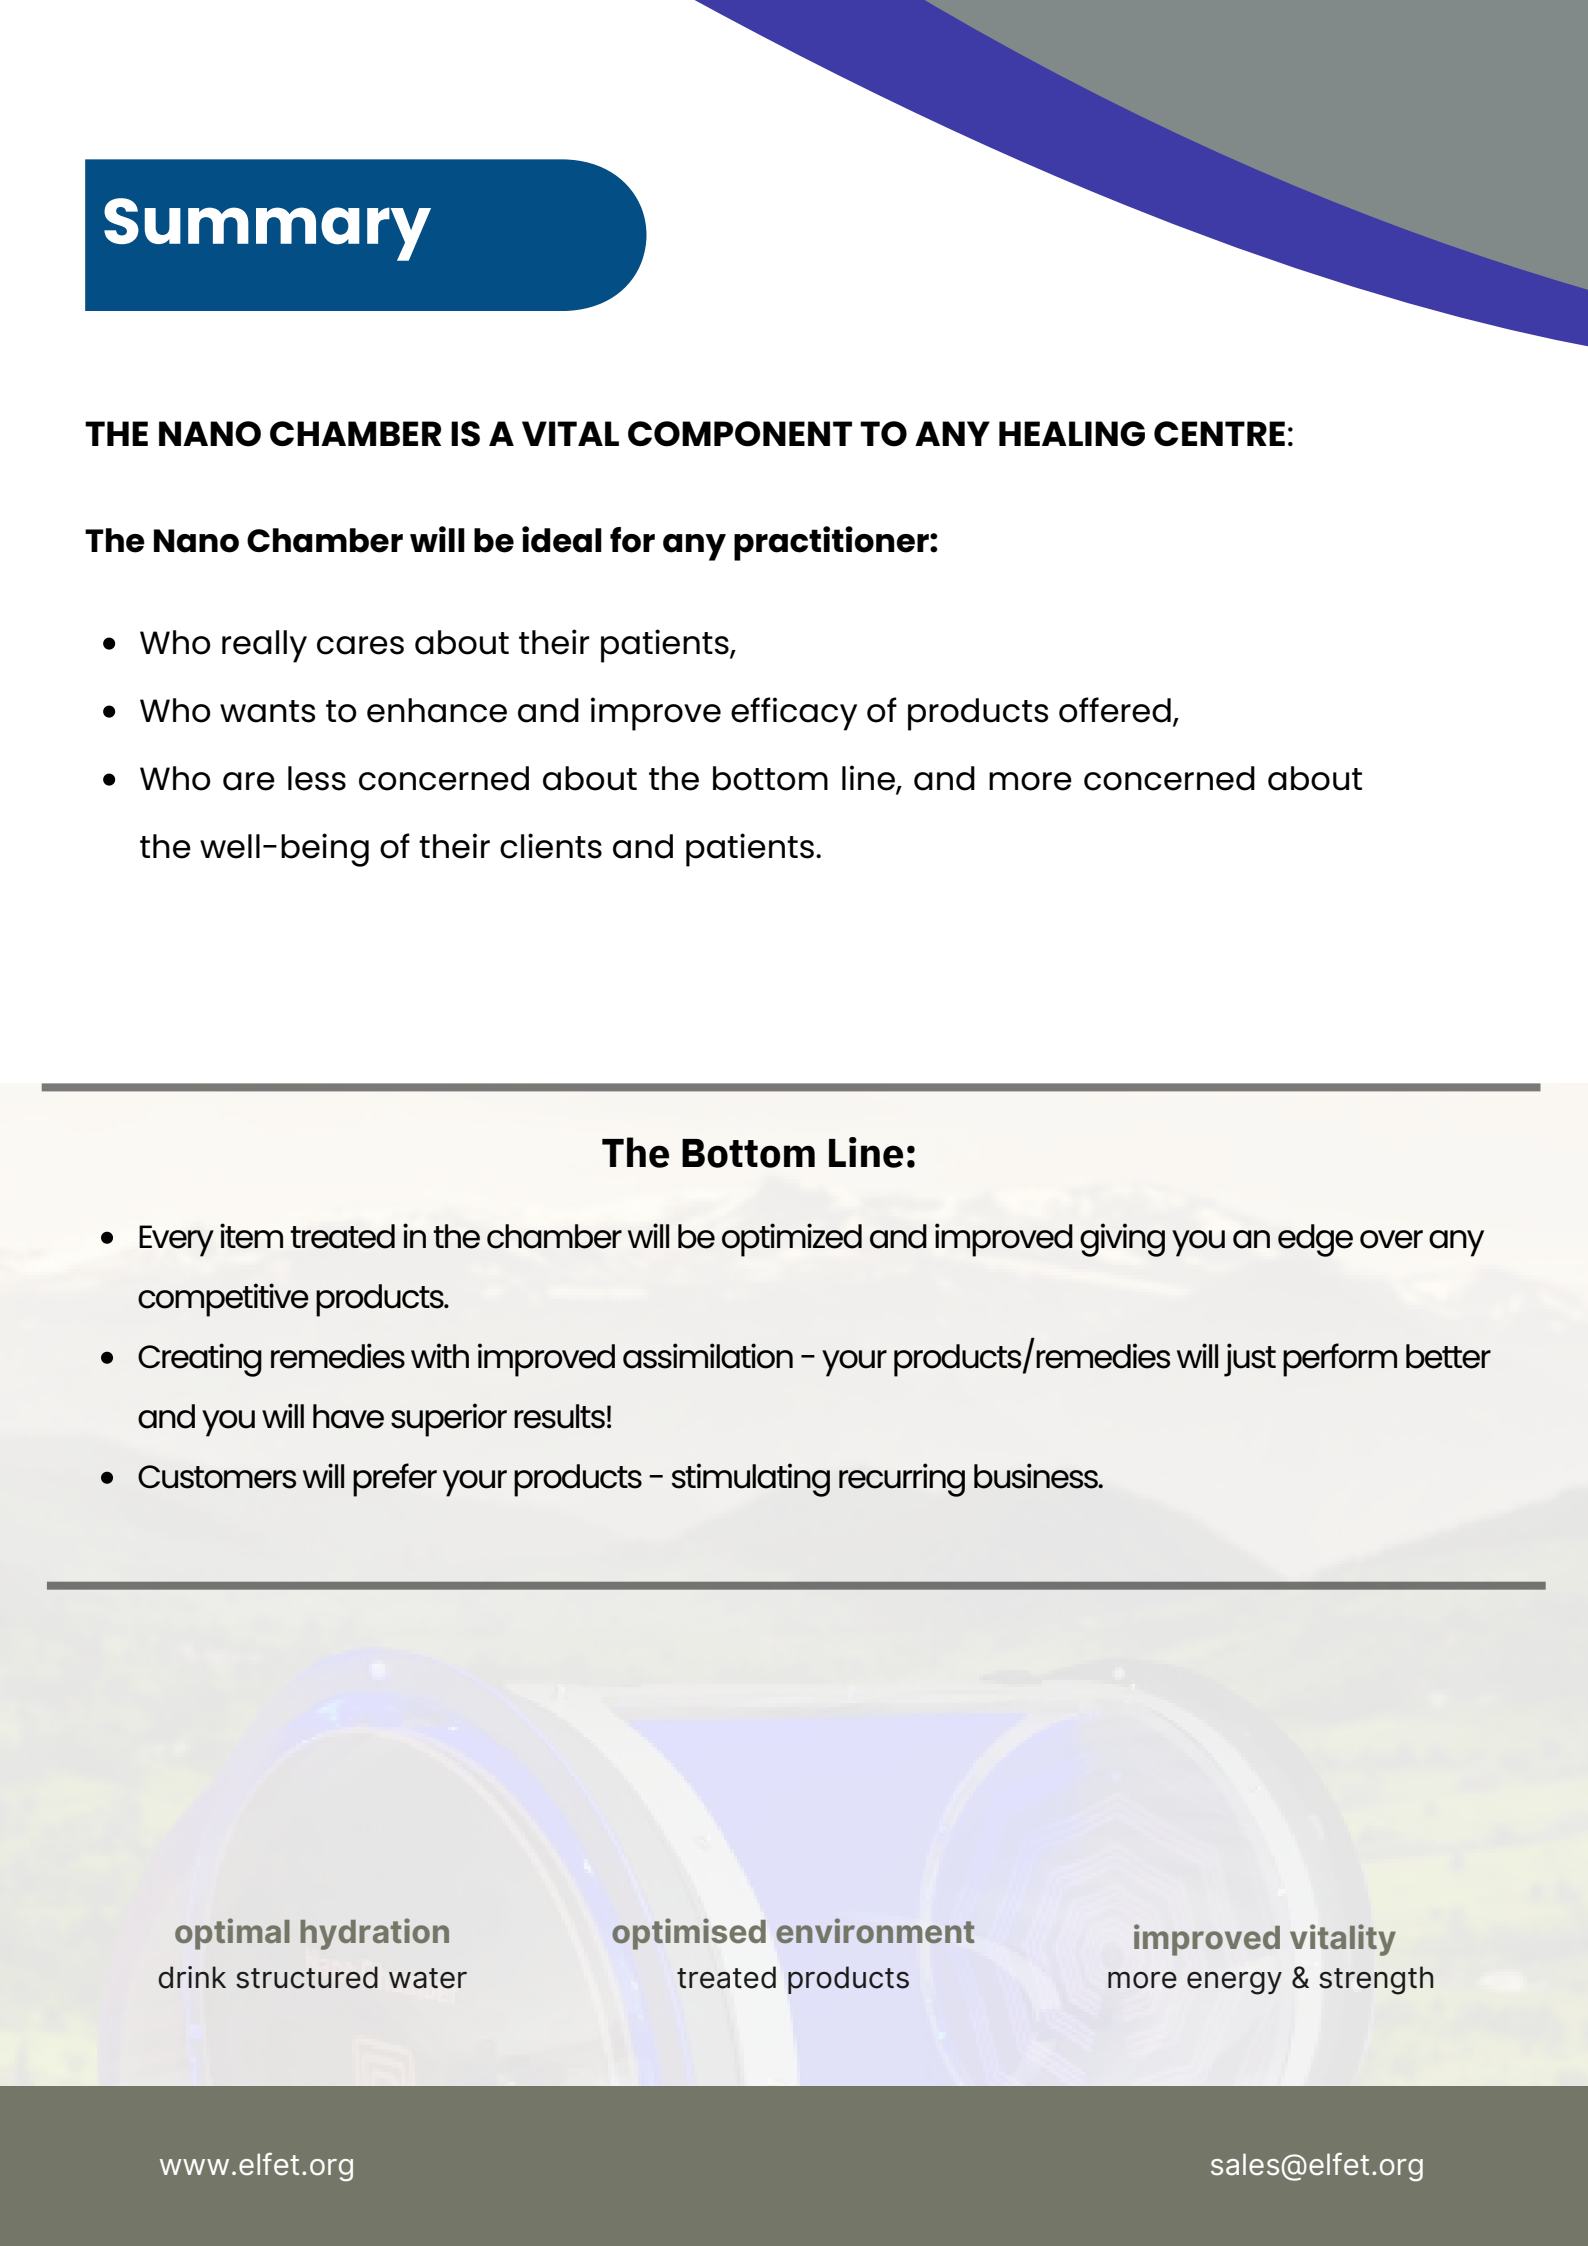

THE NANO CHAMBER IS A VITAL COMPONENT TO ANY HEALING CENTRE:

The Nano Chamber will be ideal for any practitioner:

- Who really cares about their patients,
- Who wants to enhance and improve efficacy of products offered,
- Who are less concerned about the bottom line, and more concerned about the well-being of their clients and patients.

The Bottom Line:

- Every item treated in the chamber will be optimized and improved giving you an edge over any competitive products.
- Creating remedies with improved assimilation – your products/remedies will just perform better and you will have superior results!
- Customers will prefer your products – stimulating recurring business.

optimal hydration
drink structured water

optimised environment
treated products

improved vitality
more energy & strength
